REVIEW

IT Discussion of N. Prentis & Sons IT Systems

WHAT WE

Information Systems Solutions

DO

Lithium Labs started developing apps in 2007 in the social network space, in 2010 we decided to take on the enterprise mobility market and combine our experience of Information Systems and smart mobile applications. Our employees have over 20 years of mobile expertise helping develop, implement and evolve mobility solutions within organizations around the world.

Lithium Labs provides a full suite of services for strategies, designing, developing, implementing and maintaining a enterprise mobility solution. We support all major mobile operating systems and hardware including iOS, (iPad and iPhone), Android, Blackberry , Windows Mobile, Symbol and Intermec.

WHY

Driving business value through technology

TECHNOLOGY?

>> Why?

>> Asset

>> winning

>> benefit

WHY?

- Satisfy customer requirements
- Satisfy business requirements

- "Enabler"

- Successful business is still based around the product or service

Asset

- IT consider an expense, not an asset
- Often related to large operation expenses due to requirements
- Transform your expense into an asset

winning

- Successful business is still based around the product or service
- Use IT as a competitive advantage (transformation to asset)
- How?

How?

- Implement systems
  - Not around "SAP"
- Every business big or small have very similar processes
- Why so difficult to implement?
  - Businesses fault

benefits

- Providing insight and tools to the process and where improvements and opportunities can be gained
- These systems take the procedural and gained knowledge out of the people and into a system
- Provides transparency and a consolidated collection point

- Predictable
- Repeatable
- Well defined

- These benefits take IT and transform it from an expense into an asset

Wrap up

- Value of systems is in the process
- Provide business value and then competitive advantage on the insight they provide
- Systems give your company a legacy
- Provide a continuation infrastucture
